About Us

First Western, a pioneering company based in Jeddah, Saudi Arabia, excels in landscaping, hardscaping, pump solutions, and automated farming.

Who We Are

First Western, a pioneering company based in Jeddah, Saudi Arabia, excels in landscaping, hardscaping, pump solutions, and automated farming. With over 15 years of experience and strong partnerships in both the governmental and private sectors, First Western has successfully undertaken numerous mega projects across the kingdom. Notable accomplishments include the prestigious King Abdulaziz University, Prince Norah University, King Abdullah Port in Rabigh, and the historic AlBalad area. Our expertise and commitment to excellence make us the go-to choice for innovative and sustainable solutions in the field.

What We Do

We excel in high-profile landscaping, sports facilities, historical preservation, and infrastructure projects, aiming to become Saudi Arabia's premier contracting company by 2029.

Our Mission

Our mission is to ascend as one of the premier contracting companies within the Saudi Arabian sector over the next five years

Our Vision

Looking forward to 2030, we envision solidifying our position as the paramount authority in the contracting domain of Saudi Arabia. By consistently delivering exceptional quality, innovation, and reliability in our services, we aim to set unparalleled standards within the industry. Our vision encompasses not only sustained excellence in our projects but also a commitment to contributing significantly to the nation's development and infrastructural advancements, fostering sustainable growth and prosperity for our clients and communities alike.

Our Services

At First Western, we offer a comprehensive range of services to cater to various needs in the landscaping, hardscaping, pump solutions, and automated farming sectors. Our expertise includes:

1. Landscaping:

We design and create stunning outdoor spaces, incorporating elements such as plants, trees, water features, and pathways to enhance the beauty and functionality of any area.

2. Hardscaping:

Our skilled team specializes in constructing durable and visually appealing structures like patios, walkways, retaining walls, and outdoor living spaces using high-quality materials.

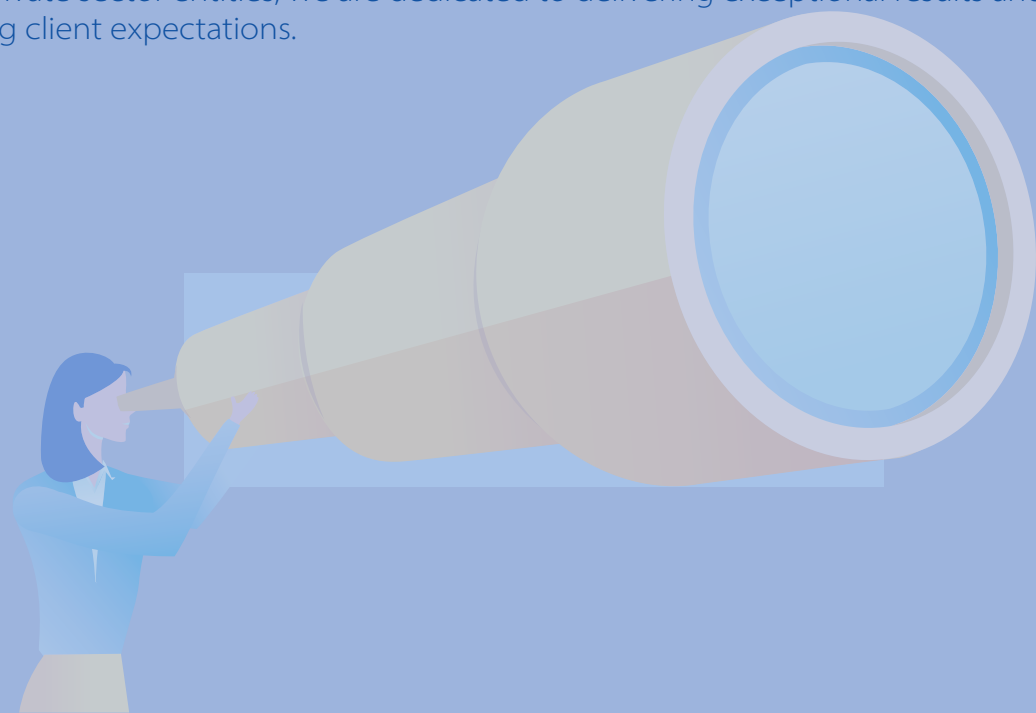

3. Pump Solutions:

We provide cutting-edge pump systems and solutions for various applications, including irrigation, water circulation, and wastewater management, ensuring efficiency and reliability.

4. Automated Farming:

Leveraging advanced technology, we offer automated farming solutions to optimize crop production, improve resource utilization, and enhance overall agricultural efficiency.

With our extensive experience and successful track record in collaborating with governmental and private sector entities, we are dedicated to delivering exceptional results and exceeding client expectations.

FIRST WESTERN
Landscape
Landscap & Hardscap

With highly qualified teams dedicated to landscaping, sports facilities, infrastructure, and the preservation of historical landmarks, we ensure optimal efficiency, productivity, and timely project completion. Our unwavering commitment to excellence positions us as a leading entity in the realm of landscaping, hardscaping, and historical preservation, contributing significantly to the cultural and structural landscape of Saudi Arabia.

PUMP SOLUTION

Recognizing the transformative power of collaborative partnerships, we've actively cultivated enduring relationships with global leaders in the pumps industry. These long-term alliances are a testament to our belief that by uniting with industry trailblazers, we can achieve far more together than alone.

naqawa **HYDROPONIC INDOOR FARM**

At Strewn, we envision a future where pesticide-free products are the new norm for business and farming practices. A future where all growers adopt sustainable, ethical and eco-friendly methods, without the use of harmful pesticides. Thus, allowing us to create a healthier world for the current and future generations. Our goal is to become the leading providers of quality, sustainable products supported

PUMP SOLUTION

Transforming Visions into Timeless Landscapes: Where Excellence Meets Innovation in Every Project Endeavor

Who We Are

Seventeen years ago, the triumphant journey of First Western PUMP SOLUTION commenced in the western reaches of Saudi Arabia. Since then, our footprint has expanded to encompass every corner of the kingdom, propelled by our commitment to flawlessly engineered products and bolstered by our unwavering dedication to professional, on-demand 24/7 service.

At the helm of our enterprise stands the First Western Pumps division, catering to the heart of the market with a comprehensive array of pump products. Complementing these offerings are a suite of related control and automation components, further solidifying our commitment to providing complete solutions.

Recognizing the transformative power of collaborative partnerships, we've actively cultivated enduring relationships with global leaders in the pumps industry. These long-term alliances are a testament to our belief that by uniting with industry trailblazers, we can achieve far more together than alone.

MISSION

We have expanded our collaboration beyond global leaders in the pumps industry to encompass partnerships with contracting entities and end-users. Our aim is to offer our partners not only products but a holistic solution tailored to fulfill their specific requirements. This extended partnership model ensures that we go beyond delivering mere goods, empowering our partners with comprehensive solutions that address their unique needs and challenges.

Excel in diverse projects: landscaping, sports facilities, infrastructure, historical preservation, contributing to Saudi Arabia's cultural landscape.

NAQAW AGRICULTURE

Transforming Visions into Timeless Landscapes: Where Excellence Meets Innovation in Every Project Endeavor

Who We Are

Strewn is a Saudi company that sells pesticide-free strawberry using hydroponics technology. We are committed to providing sustainable and quality food options for our customers and strive to be a leading example of innovation in the F&B industry. Our urban farm is powered by recycable & renewable energy using cutting-edge technology to create a flavorful and nutritious product.

MISSION

To provide quality strawberries using sustainable hydroponic farming methods. We are committed to an eco-friendly system to preserve the environment while producing clean and natural berries.

STREWVN
Organic & Sustainable

Hydroponic Farming is the Future!

The benefits of hydroponics empower farmers to grow more efficiently and effectively. They are able to manage pH and nutrients to make sure plants are getting the exact nutrients they need. The systems are closed and recycle the water that is not used by plants. The ability to grow indoors allows farmers to control temperatures and lighting schedules to improve plant production. Systems can be designed to make use of vertical space and increase planting density. Hydroponics also allows us to create farms in locations where soil conditions are too poor to support farming or space is limited and a farm otherwise couldn't exist.
